DreamPlug - DevKit (/p-41-dreamplug-devkit.aspx)
Our Engineers have taken what you loved about the GuruPlugs and have raised the bar even higher by adding more enhancements such as: Audio (both analogue and digital), more options to increase memory, and, a totally redesigned enclosure with an innovative power supply arrangement. Now Designers and Developers will be able to use this new powerful Development Kit to bring your applications to market quickly and more efficiently. We just had to call our new product:

THE "DREAM PLUG"- use this powerful Computer to make your Dream Application a Reality !!!

Packaged in a low profile design the DevKit offers:

    CPU - Marvell Kirkwood 88F6281 @ 1.2GHz speed

    Linux 2.6.3x Kernel

    512MB 16bit DDR2-800 MHz

    2MB SPI NOR Flash for uboot

    4 GB on board micro-SD for kernel and root file system

    2 x Gigabit Ethernet 10/100/1000 Mbps
    2 x USB 2.0 ports (Host)
    1 x eSATA 2.0 port -3Gbps SATAII

Price: $159.00 (USD)

Quantity: 1   Add To Cart

1 x SD socket for user expansion/application

WiFi 802.11 b/g/n

Bluetooth 2.1 + EDR

Audio Interfaces

5V3A DC power supply
